■ Historical difficulties and core problems of water affairs

Urban water
shortage

Meter reading
difficulty

Low information level

Meter Reading Robots

**Meter reading robots
& intelligent movement of
water meter**

Core advantages: pioneered photographing intelligent meter reading solutions within the industry.
while solving the problem of meter reading difficulty, providing water supply companies with various most basic data information

Features of meter reading robot

Three major features

1、flexible remote transmitting

2、no need to transform

3、adapt to various water meters

Product concepts and operation ideas of intelligent meter reading

Solve manual meter reading difficulty by machine intelligence

Provide clients with overall intelligent meter reading solutions

Concentrate on intelligent meter reading, do not produce water meters

Realize information operation within the industry by water affairs cloud platform

Internet of Things Technology and Meter Reading Robot

you can throw away the big power box

Large scale deployment in cities

Install beside the river of remote villages

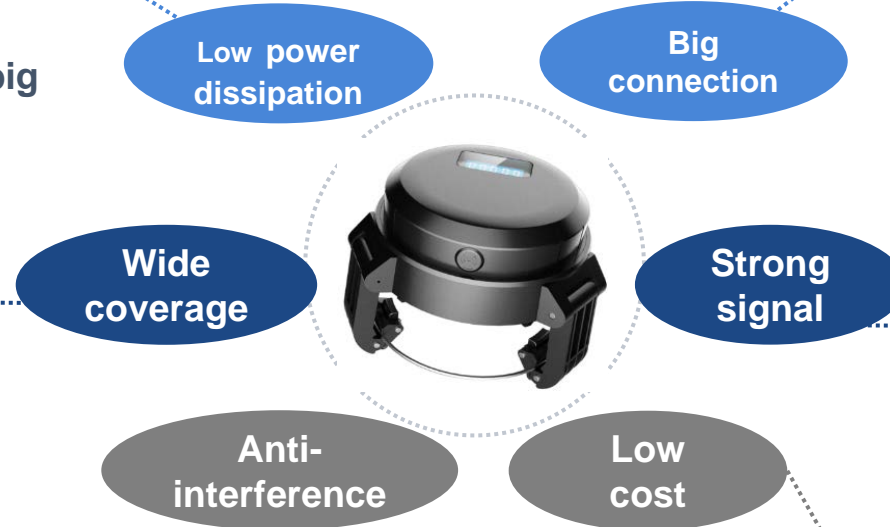

Underground tube well

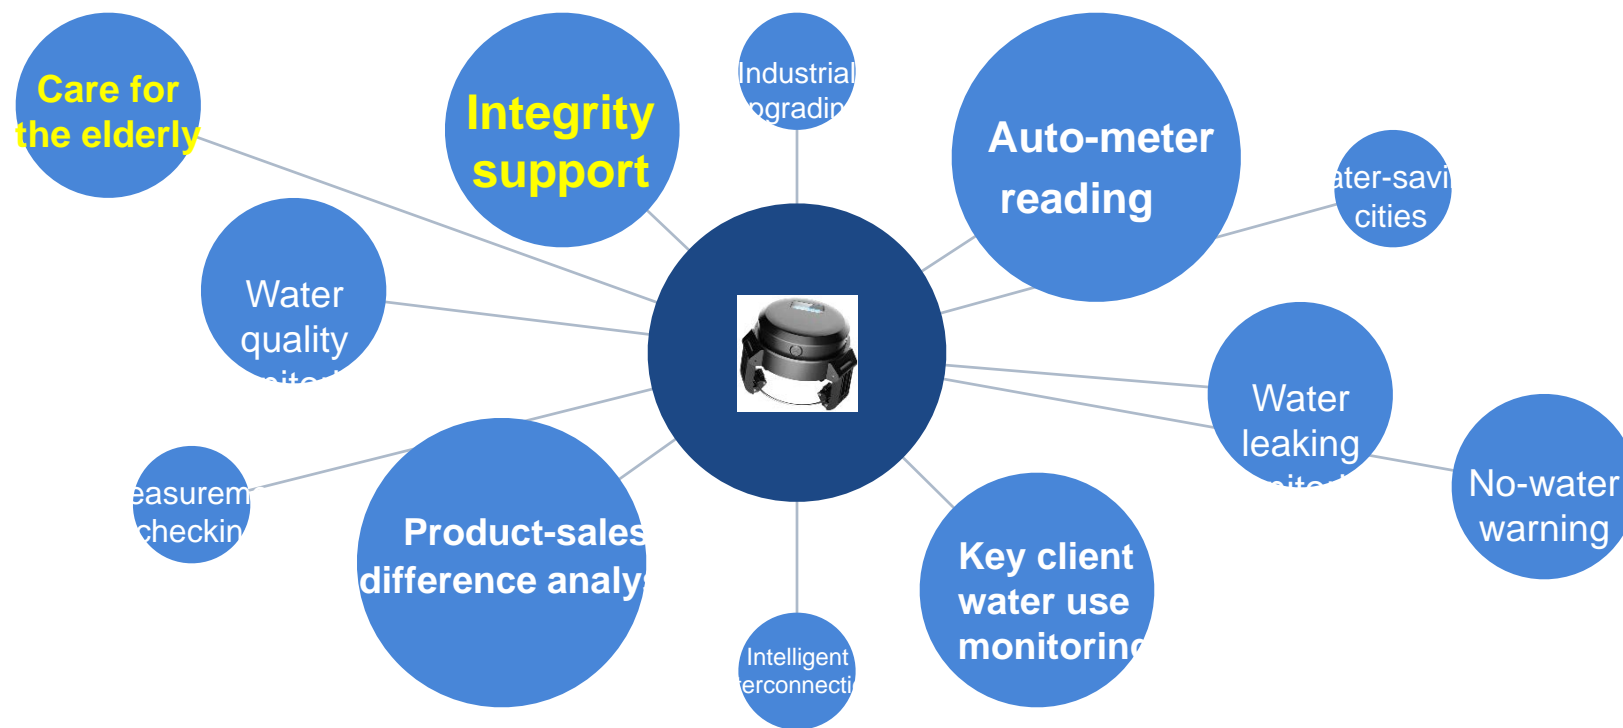

Industrial water use monitoring

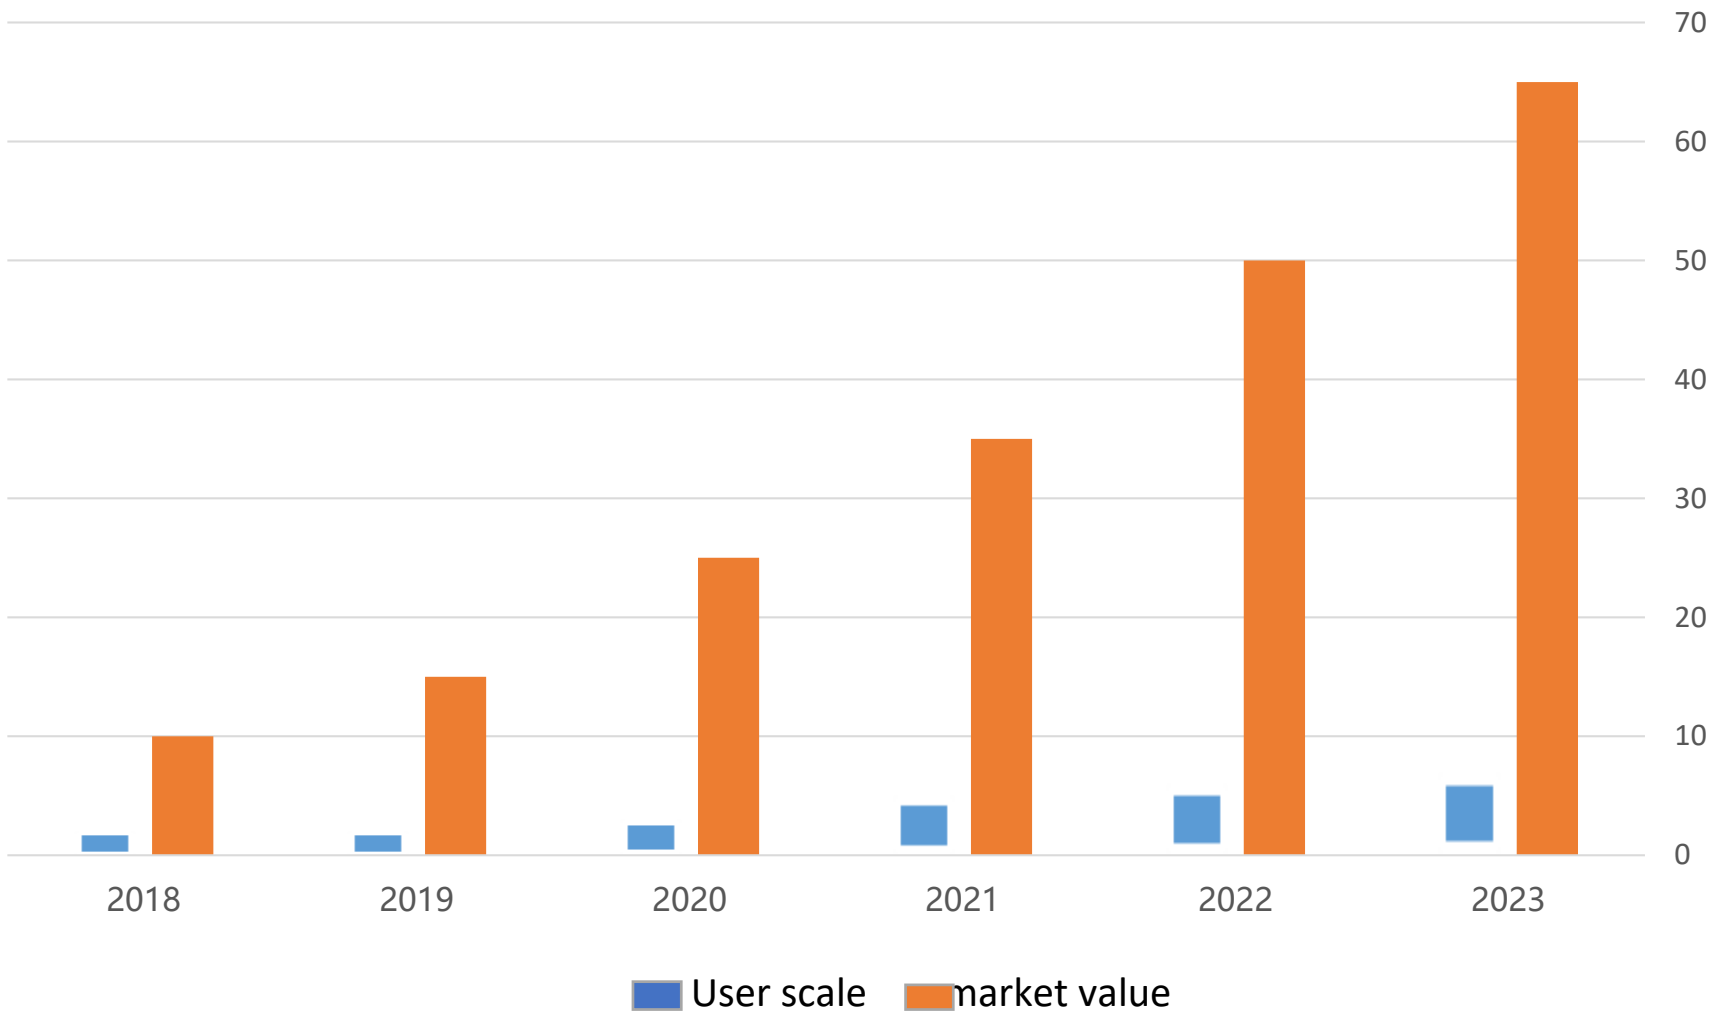

Household meter reading

New Functions out of Expectation

Market value from 2018 to 2023

Intelligent meter reading will cover 250 million families worth of USD 20 billion from 2018 to 2023

Territory of use

- The meter reading robot has been used in more than 15 provinces in China.
- At the same time, there are many international customers such as Japan, Thailand and Malaysia.
- This visit to Finland is also a pioneering journey, hoping that the meter reading robot can also help Finland's smart city construction.

The fifth historic leap-forward of human-water harmonious coexistence

King Yu taming the flood

Change blocking into dredging

Dujiangyan

draw on advantages and avoid disadvantages

Water plants in the late Qing Dynasty

Industrial production

Water meter in the Republic of China Era

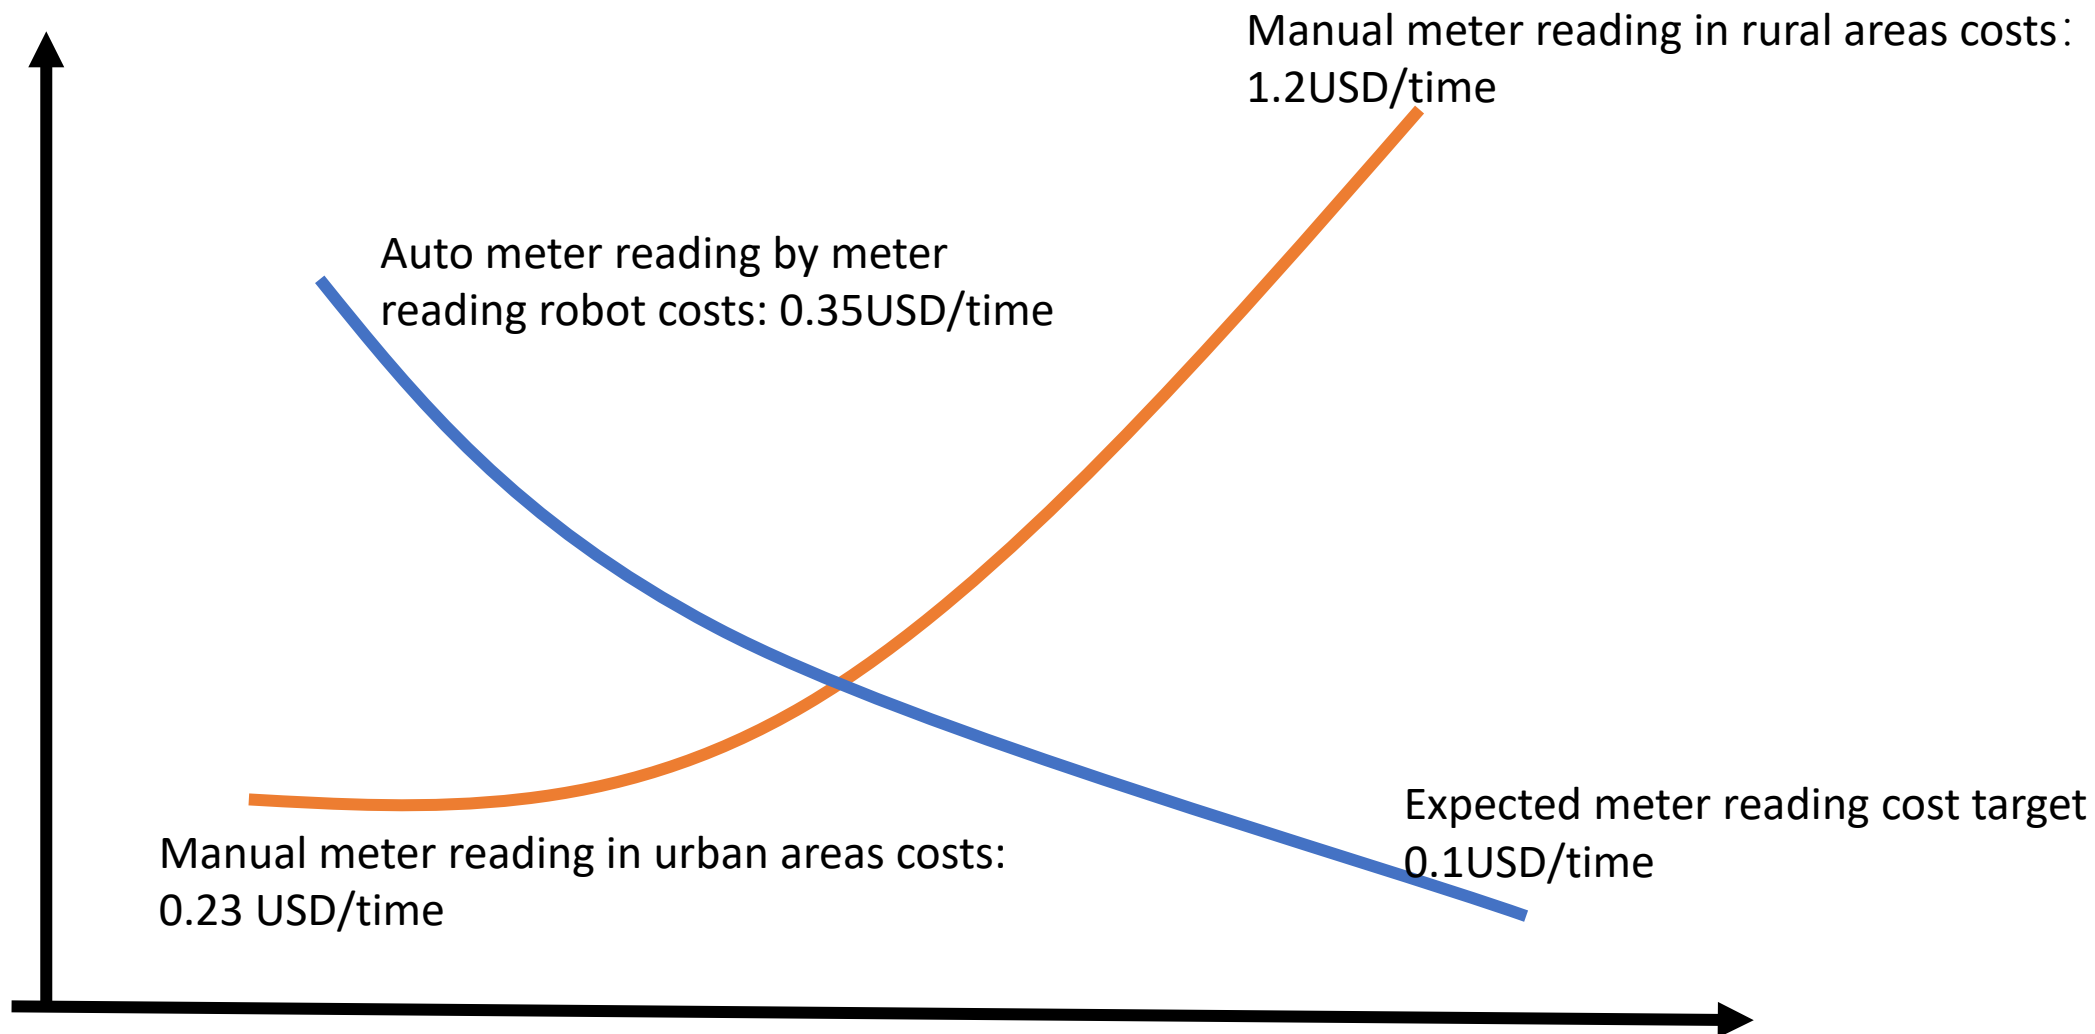

Measuring operation

Intelligent water meter

Intelligent sensing

Challenges Confronting Meter Reading Robots

Sincerely invite cooperation

lot operator

Water information solutions provider

Water supply company

Thank you
