

REALMAX

THE CREATOR OF INTERACTION, VISUALIZATION AND CONNECTION

Company Profile

Profile

RealMax is a global leader in AR (Augmented Reality) technology and was founded in 2003. The Chinese name is Tapuyihai (Shanghai) Intelligent Technology Co., Ltd. Headquartered in Shanghai, it has established subsidiaries in Beijing, Chengdu, Xi'an, Hong Kong, New York, and Finland, becoming an international company that promotes AR ecology.

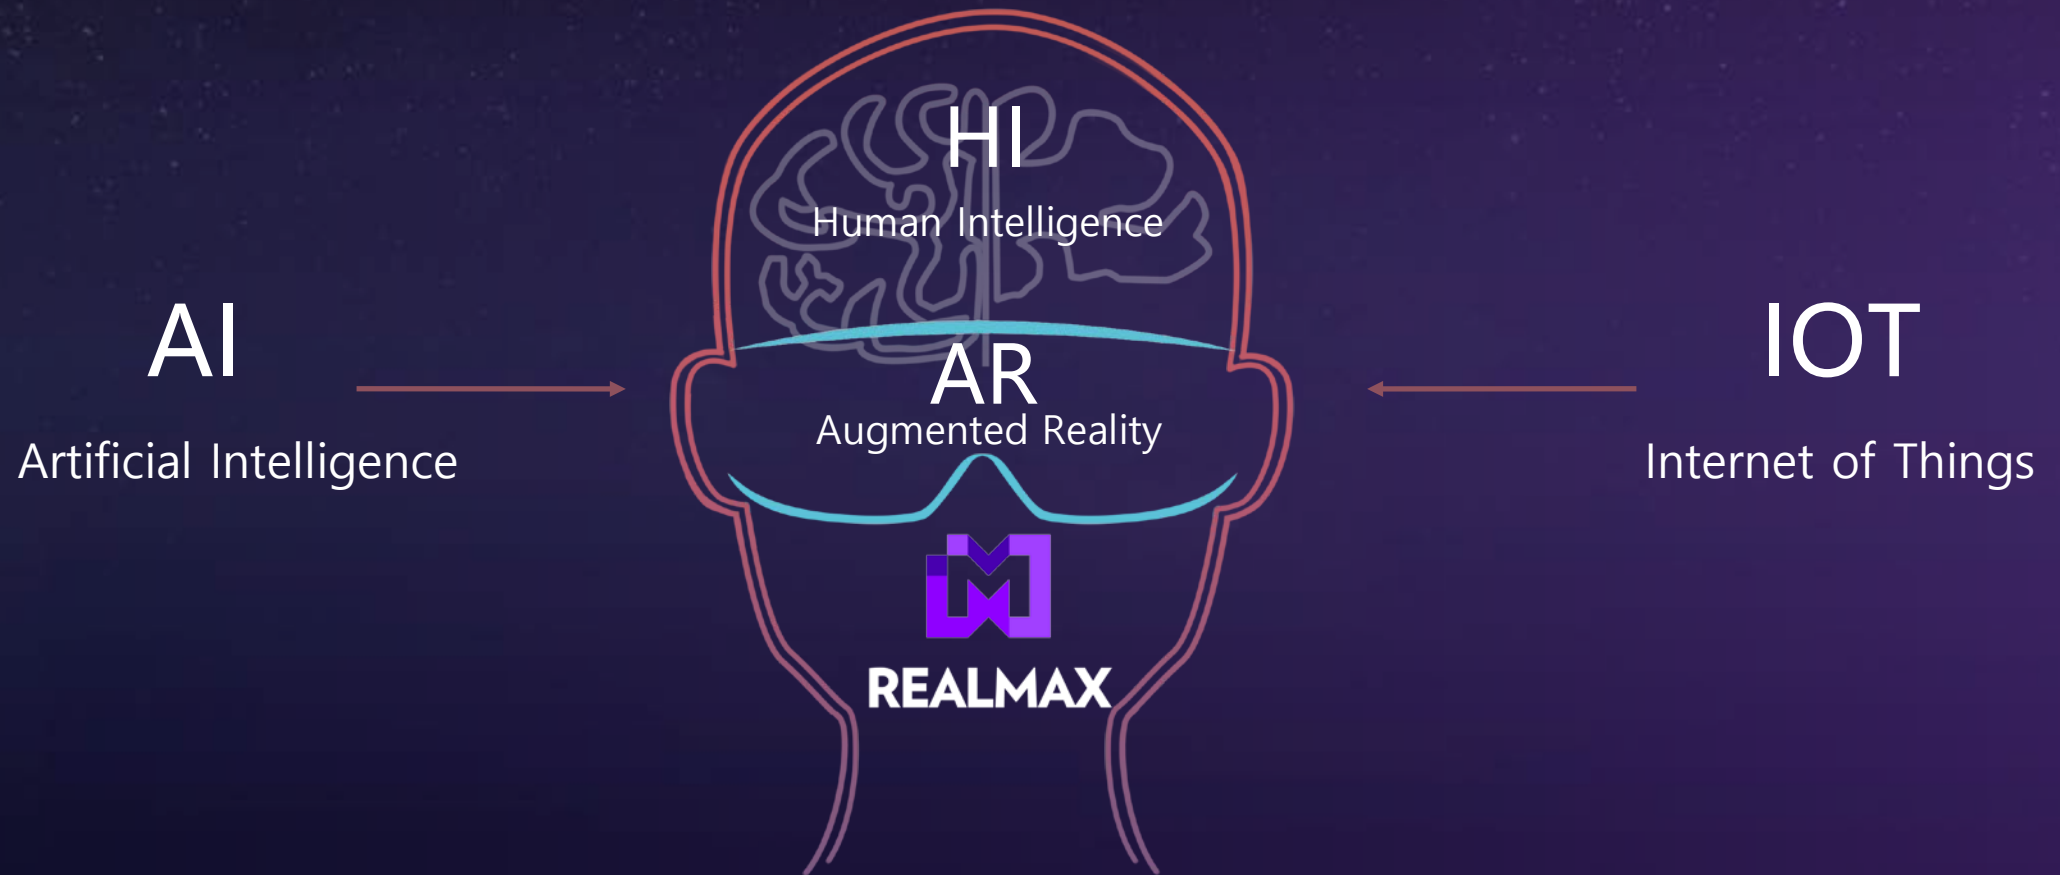

In education, the company has focused on transforming cutting-edge technology such as Big Data, Internet of Things, 3D printing, drones, smart manufacturing, and robotics into teaching resources that can be used for teaching in the past 13 years and has accumulated rich experience in Chinese education market and provided quality services to more than 700 universities.

In the industrial market, RealMax proposes a comprehensive solution to solve the industrial sore points. Realmax product aims to free up hands, ensure on-site safety, facilitate remote guidance and allow big data transmission, further realizing the goal of "smart manufacturing 2025" in terms of efficiency, security, and data.

In other markets, such as tourism, cultural, medical, security, entertainment, e-commerce, film and video, etc., Realmax is committed to transforming mature AR technologies into commercial AR products in vertical industries and helping partners to implement and upgrade their technologies and

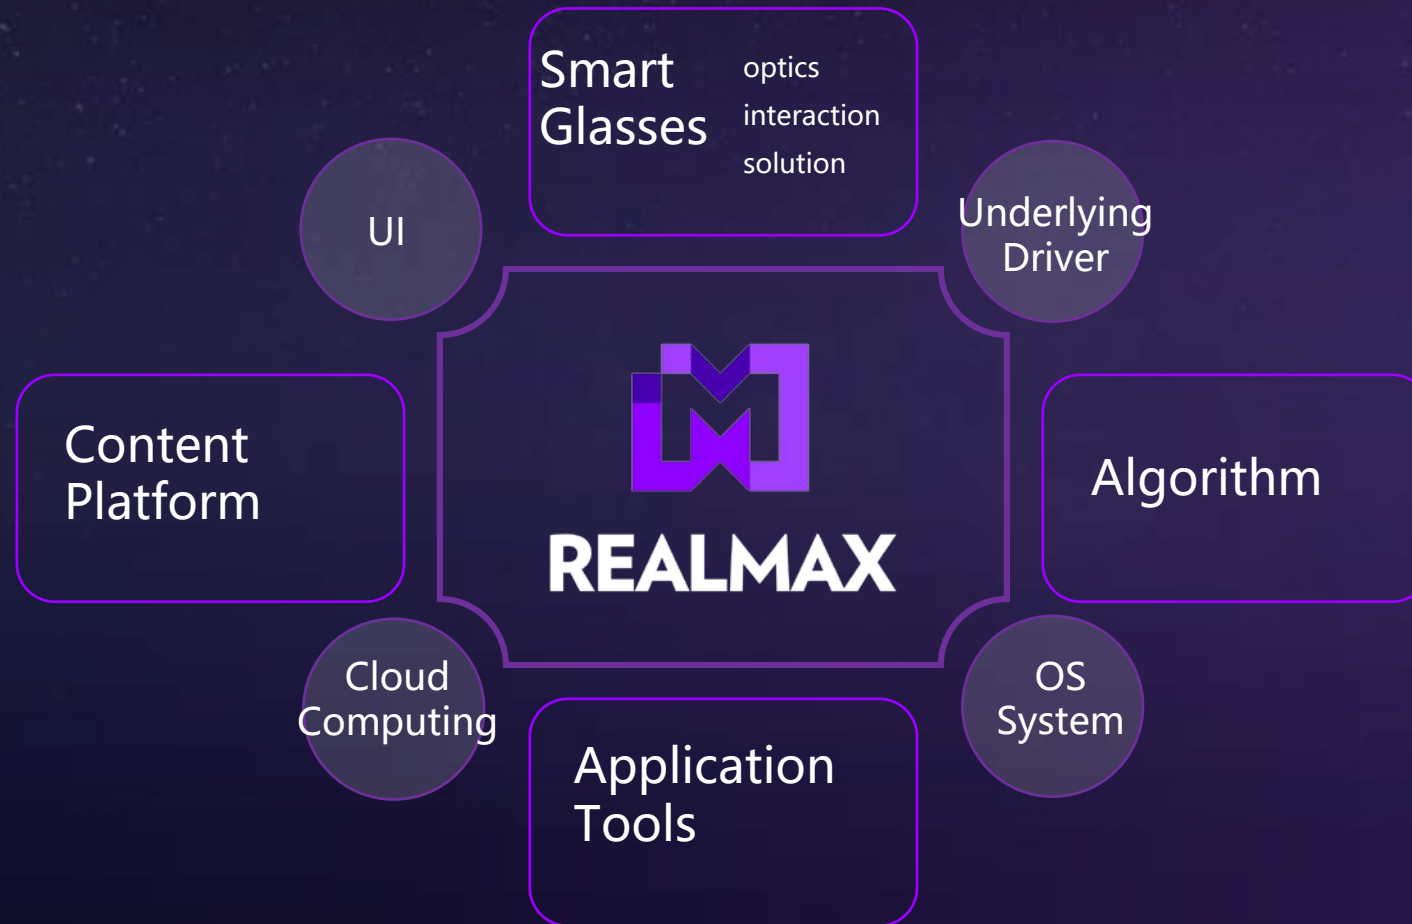

Vision

Deepen human understanding by making AR accessible to everyone.
